ENVISION FOR DXC/ ORACLE INFRASTRUCTURE TRANSFORMATION

Chart the future of your modern Oracle infrastructure

What is it?

ENVISION for Oracle transformation is a one-day facilitated problem-solving workshop that brings leadership teams together to identify and prioritize their business strategies and outcomes for building their modern Oracle infrastructure.

No PowerPoint. No laptops. No cellphones. ENVISION creates a cutting-edge, focused, collaborative environment and employs proven methodologies to help clients explore, articulate, and build their digital transformation plan.

Business Outcomes

During your ENVISION engagement, you will:

Build your vision of an agile, cost-effective computing environment to support existing and future projects

Understand the financial and operational risks associated with your legacy Oracle environment

Develop a short-term plan to identify and remove costs from your existing infrastructure

Establish a methodology to prioritize how systems and applications will migrate to your modern platform

Build a digital transformation plan to implement your digital platform and leverage emerging technologies such as AI and IoT
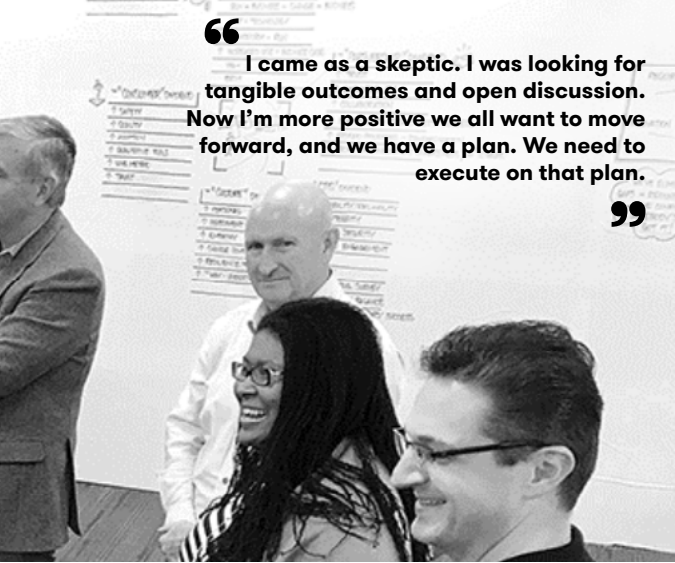

ENVISION has delivered over 400 successful engagements with Fortune 500 clients, averaging an NPS (Net Promoter Score) of 70 across Financial Services, Healthcare, and other industries.

" **Today was great at helping this team develop an interlock, clarifying where we need to focus to enable the business shift. ""**

Benefits

- Allows leadership teams to collaborate, co-designing their future state while identifying the shared journey of business and IT

- Improves clarity and alignment around a shared vision through live visual synthesis

- Co-creation with your trusted DXC and/or Oracle partner provides a more holistic understanding of the business challenges, opportunities, and actions required for success

- Articulating business outcomes with a clear visualization of the future accelerates the value realization

" **I came as a skeptic. I was looking for tangible outcomes and open discussion. Now I'm more positive we all want to move forward, and we have a plan. We need to execute on that plan. ""**

According to Gartner, **87% of senior business leaders say digitalization is a company priority, and 79% of corporate strategists say it is creating new revenue streams in new ways. Is your Oracle infrastructure ready to support your digital strategy?**
