Is it time to upgrade your existing on-premises Microsoft Dynamics ERP solution to a cloud-based model, or migrate to Microsoft Dynamics 365? Are you looking to gain a competitive edge in the marketplace with business transformation? If so, DXC can help with our Ground to Cloud upgrade and business transformation assessments.

Leverage a cross-functional team of experts within business applications, cloud, industries, AppDev and artificial intelligence (AI) to create a roadmap tailored to your business needs to provide a clear path forward.

If you are like many DXC customers, your ERP solution has been in place for many years — and although your business has evolved, your current solutions and processes may have not. Ask yourself, is it time to evolve, leverage best practices to digitally transform and modernize your solutions?

Why Microsoft Dynamics 365 Finance?

With Microsoft Dynamics 365, customers are moving beyond the standard features of ERP and exploring the power of the Microsoft Cloud. Dynamics 365 Finance enables customers to:

- Enable data-driven decision making
- Automate financial processes
- Drive efficiencies across the business
- Reduce risks and complexities

Ground to Cloud assessments

When deciding to move forward to a Dynamics 365 solution, it is imperative that you take the proper steps of performing a current-state technical and function review. This will help determine whether you need all of your legacy processes, identify areas that can be streamlined and determine what's needed to create the best plan to move forward.

DXC Ground to Cloud options include both technology and business transformation assessments. Our cross-functional team will create a full 360-degree-view and analysis of your business.

• Upgrade assessment:

Focused on the technical state of your on-premises ERP application and what it will take to move to a cloud-based model. Gain a valuable roadmap on "as-is, optimized and net new processes" to provide you with a clear path forward.

• Business transformation assessment:

Focused on the future state of your business, technical and organizational needs. Gain a detailed roadmap of "what's possible."

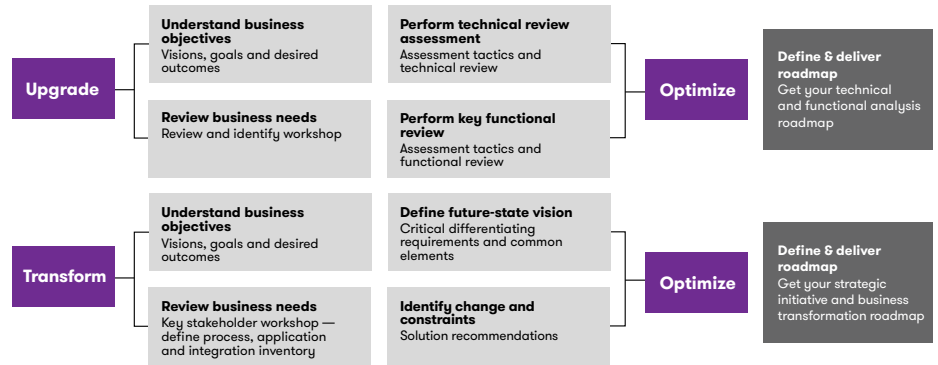

On-premises to cloud considerations

- Want to proactively plan for Microsoft’s Dynamics AX end-of-support deadline?
- Want to transform the way you interact with your customers and modernize the way you do business to gain a competitive edge?
- Want to identify the timelines and most cost-effective way to migrate your Dynamics AX solution to a cloud-based model?
- Want to gain insights and education around cloud infrastructure, application development and reporting but don’t know where to start?
- Want to leverage a cross-functional team of application, cloud, DevOps and AI experts working on your behalf to build you a cloud roadmap?
- Want a roadmap to migrate to the cloud, leverage technology best practices, and gain insights specific to your business
- Want to rid yourself of multiple, older systems that don’t talk to one another and move to a modern, supportable solution?

Upgrade and Business transformation assessments:
Pick your path, or choose to do both for a discounted price

Assessment benefits

- Fast, low-risk way to understand the likely cost, impact and timeline for upgrading, migrating or re-implementing your ERP solution, or transforming your business applications across the entire business
- Helps decision-makers reach alignment on process improvement, best practices and technology solutions required to achieve goals
- Aims to accelerate business processes, customizations, reports, integrations and data migration across all applications
- Based on years of best practices, application and cloud expertise, we deliver an effort estimate and provide an actionable roadmap
- Establishes clear priorities, based on business drivers and informs budget planning

Ground to Cloud for ERP in 4 steps:

- 1 Execute an assessment.
- 2 Review assessment outcomes and follow roadmap.
- 3 Choose an implementation path forward.
- 4 Choose a support plan.
